s be 1½ feet, while the heights of the door and the window for the same room are shewn to be 6½ feet and 3 feet respectively, and to request that this apparent inconsistency may be explained.

It has been stated in the Communication under reply that the cost of building bath room may be met "from the general Savings Rs 28-12-7, credited during March 1890 of this Chattram while it is remarked at the same time in another part the Docket that there is no Surplus Fund at its edit. This is quite unintelligible and requires explanation.

The enclosure to his Docket is herewith returned.

In docket No 550 dated 14th
August 1892 regarding the
estimate to construct a
new bath room in the
Commissioner's Cutcherry,
Cox's Bazar.

With reference to para
1 of the above letter
have to state that 1½
ft has been added in
the estimate ... the height

3

of the "Kachalu" which means the enclosure within which the person sits when bathing, and not as the height of the bath room as stated in the docket under reference. It will be seen from the sketch in the Estimate that the height of the wall of the bath room is 6 ft.

Referring to para 2, beg to state that the town supply fund is usually applied to such savings as are effected by sale of unserviceable vessels and from feeding charges etc and which remain at the credit of the institution concerned in the Taluk Treasury. At the close of the official year, the savings effected from the withdrawn amount out of the allotment of

the Institutions and sanctioned by the Comptroller as per his circular No. 417 of 30th June 1866 are credited in the Militia Pre army ad General Savings.

The sum of Rs. 24-12-7 specified in the docket relates to the latter item.

The Estimate returned is herewith resubmitted.
